Report on Use of Computer Lab facilities by Student Teachers

The computer lab at BLDEA's JSS College of Education, Vijayapur, is a vital resource for student teachers. It provides essential tools and a conducive environment for various academic activities, fostering digital literacy and enhancing learning experiences.

ICT Period in the Timetable

Incorporating Information and Communication Technology (ICT) into the curriculum is crucial in today's digital age. The college timetable includes dedicated ICT periods, ensuring that students receive structured instruction in digital tools and techniques. This period covers a range of topics from basic computer operations to advanced software applications, helping students integrate technology into their teaching practices effectively.

Preparation of Presentations (PPTs)

The computer lab is extensively used by student teachers to prepare PowerPoint presentations. These presentations are a key component of their coursework, enabling them to:

Organize and present information visually

Creating PPTs helps students learn how to convey their ideas clearly and engagingly.

Develop technical skills

Using presentation software enhances their proficiency with digital tools.

Enhance public speaking skills

Presenting their PPTs in class allows students to practice and refine their communication skills.

The lab provides access to the necessary software and internet resources, allowing students to research and design high-quality presentations.

Practical Work in the Computer Lab

Practical sessions in the computer lab are integral to the students' learning experience. These sessions include:

Hands-on practice with educational software

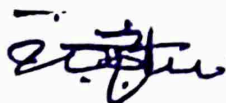

Students use various educational tools and applications to simulate classroom scenarios and develop teaching aids.

Data analysis and research project

The lab facilitates projects that require data collection, analysis, and interpretation, helping students develop critical research skills.

Conclusion

The computer lab at BLDEA's JSS College of Education is a cornerstone of the academic framework, providing essential support for the integration of technology into education. Through structured ICT periods, preparation of presentations, and practical work, the lab ensures that student teachers are well-equipped with the digital skills necessary for modern teaching environments.
