Problem Solving skills among college students.

3

work :- April 2018 (Teaching Education)

Investigator :-
maathis
phd scholar, government arts college
Salem, Tamil nadu, India.

Objectives :-

The study assessed the problem making skills among college students in educational institutions of Tamil nadu. A total of 25 college students from Tamil nadu constituted the sample for the present study the data was collected using random sampling technique. The level of problem solving skills of college students is high also found that there is no significant difference between male and female college students with respect to decision making skills. However when the means of male female were compared the problem solving skills of female was higher than the males, on the basis of their gender age difference married status.

Methodology :-

population → all the students in college in Tamilnadu constituted the population for present study. sample → sample is taken from both online and offline for offline the researcher listed down the colleges in Tamil nadu from the list the researcher randomly,

→ Administration of questionnaire → data was collected from offline and online mode. offline means investigator visited to the college in person.

Administration → A planned schedule by the investigator visited selected colleges in Salem and Nagereedu districts of Tamil Nadu after giving a brief introduction about the investigator the investigator established a rapport with college students and explained the purpose of research and encouraged them to be free and frank in giving the responses

Tools used for the present study

- 1) Tools used personal data form prepared by the investigator.
- 2) Problem solving skill standard by Min Basadue's Simplex (1995)

Major findings:

problem solving is the important skill for business and life. problem solving after problem decision making and decision-making is especially important for management and leadership since Today's students' are tomorrow's leader

It is inferred that 49% of college students have scored 37-50, 17.8% of them have scored 24-36 and 3.29% of them have scored 10-23. therefore it is interpreted 49% belongs to high level

The female college students are better than the male college students

The married college students are better than the unmarried college students

- 6 Jaya Amantha kumar

Objectives →

previous studies revealed that many students cannot perform well when it comes to word problem-solving questions. There are various problem solving strategies that can be applied to help students to overcome the problem

Visualisation techniques in learning have been used to help students enhance their conceptual understanding of the mathematical problem

The analysis of semi-structured interview transcripts revealed the level of understanding and motivation influence students performance. findings of this study showed that students perform better after the implementation of the Bar model in mathematical problem solving

Methodology:-

This quantitative research employed the peer-experimental design. Samples were chosen based on convenience sampling.

6

participants answered pre-test questions before receiving the treatment. The bar model, the participants were given 50 minutes each to complete the test & 5 minutes each to complete the test 5 minutes for each question. The treatment was introduced after the participants have finished doing their pre-test. The treatment was conducted by introducing and teaching students the application of bar model in problem-solving of addition and subtraction and then followed by the post-test that was carried out after giving the treatment in three different sessions for a week.

The verbatim transcripts were analysed through thematic analysis and all major themes relating to their experiences using the Bar model were taken as the results of the interview.

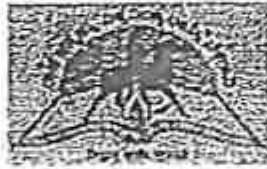

Major findings:-

There were two major themes deduced from the analysis. The first theme was the level of understanding. The extent to which the technique is beneficial to the students depends on their understanding. As using it initially could not understand the bar model.

They were attracted and interested to use the technique and tried to solve the questions. Based on the interviews conducted, all participants including the low-performance level students were interested and motivated to use the bar model in mathematical problem-solving.

NEP-2020

What is National Education
National Education Policy (2020) a
game changer in a era when Indian
Education is lapping up challenges and
responsibilities in every sphere of learning.
It speaks of how Education can step in
to solve society problem & help partner
with students for our nation's progress.
NEP is a framework designed to see a
mindset change in the community, parents,
students & educators.

A National Educational Policy is designed
to offer a holistic Education from the
time they are three until they are
ready for careers. It includes pre-primary,
middle school, college, university and
research students. Along with the regular
school/college Education.

NEP-2020 instills skill in each student.
For instance a girl child who enrolls
in a school to acquire a degree in her
chosen subjects would also benefit from
training specific life skills or industry
skills based on her aptitude.

Key principles of NEP

* The fundamental principle is to guide the Educational system and individual institutions with in will do this by recognize in and development the unique capabilities of institutes

* This is by all to highest priority of achieving foundation of literacy & numeracy students atleast up to the 1st standard grade.

* Here Education is more flexible where learners can choose their learning trajectories and numeracy for students at least up to the III standard grade

* Here Education is more flexible where learners choose their learning trajectories and programmes they can select their path according to their talents interests,

* Moreover there are no rigid restraint in choosing subjects here in NEP. therefore unlikely that they will be a hard line between curricular and extracurricular activities

Who will be providing training to teachers in NEP?

In the primary section the respective state government will provide the necessary training to their teachers. However, the salient features of that training will be given will be state government will provide the necessary training to their teachers. Furthermore, state government will establish their own research centres to promote development. The research will be integral to primary education. aided by quality textbooks and excellent teaching.

In addition, the sincerity of the NEP's purpose will be demonstrated by its inclusion of these features. Teacher trainers are critical to the success of NEP. The NEP takes an innovative approach by bringing non-traditional sense these officers are not trainers. However, trainers are expected to emerge even amongst the teachers community. As students and teachers have to be education holistic providing training to teachers is a critical part of NEP.

IN NEP INCLUSIVITY of religious minorities.

Minorities religious population are lagging when it comes to receiving modern Education. Large strata of minority people do not have access to holistic and modern Education even today.

The religious institution they are attached to are the only ones providing Education to many of these communities. Their Education to many of these communities is primarily based on spiritual teachings and modern science and technology are still foreign to them.

If they are to gain access to global knowledge and information these factors need to be considered. Therefore to bring the minority community into the modern Education segment. As we have already discussed the aspect of inclusivity is implied in the NEP framework and it will help to bring the marginalised & deprived communities

Will NEP Ensure univer- -sal Education

NEP has a great belief in universal Education however not just Education for all but Quality Education for all sections of society. including the Economically disadvantaged sections such as women tribes and SCs makes NEP step above the rest

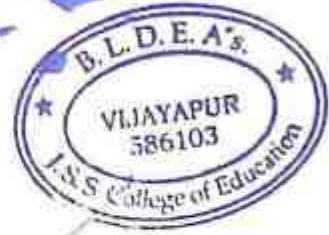

The Earlier policies also aimed at universal Education but we were far from achieving it for various reasons, therefore NEP 2020 focuses on ECE and attempts to reduce dropout rates by restructuring the learning process, and bringing in child-care initiatives.

Bringing a child to school as well as taking Education to the child is important to ensure universal Education NEP 2020 ensure that Education reaches every child

The Earlier policies also aimed at universal Education but we were far from achieving it for various reasons \therefore NEP 2020.
