Planning a Vacation

- * Firstly we have to figure out our travel budget
- * Then we have to decide on our travel style and members
- * Next we have to choose a destination
- * Then comes booking the tickets, it may through flights, trains or a road trip. According to your convenience.
- * Then booking a hotel room. It depends on how long our vacation is, according to that we may book all our accommodation.
- * Before heading to the vacation, we want to consider location like most visited places and most central location.
- * We also consider transportation in a new city. If the city is very walkable, then we'll want to stay right in the center or public transportation is easily accessible in every location.

* Even though we might be safer abroad than in our country, but accidents happen everywhere and we should always be covered and we should never leave home without travel insurance.

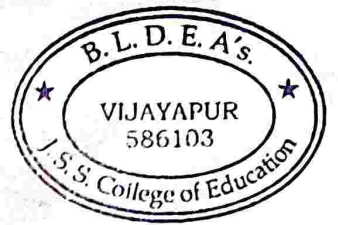

* We have to minimize travel risks by registering on our country's smart traveller program, by getting all necessary immunizations, by scanning our documents and e-mail ourselves a copy, by knowing common scams and all.

* Finally packing for a trip can be quite the puzzle but we have to be prepared and should not forget anything important. There must be no weighed by too much stuff.

* Last minute preparations are also needed like checking the data internet access, can download some helpful apps, having a plan of currency, can learn the language like at least a few phrases and all.

* Confirm everything and enjoy the
Vacation
